

# Biome: Ocean

Great White Shark  
*Carcharodon carcharias*

Humpback Whale  
*Megaptera novaeangliae*

The most diverse biome!

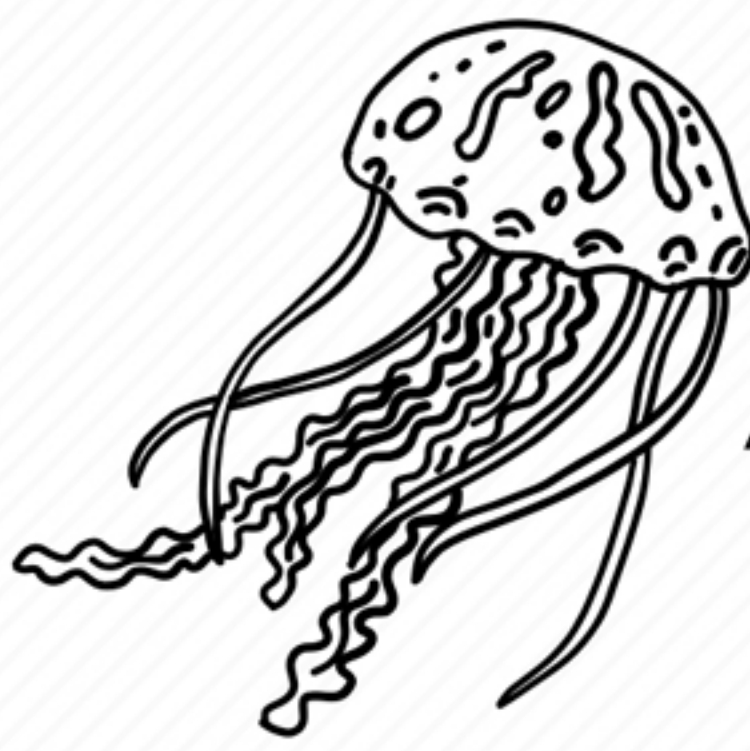

Home to marine microbes - invisible to the naked eye! Also home to the largest mammals on earth, whales!

How you can help!

- reduce your waste    reduce, reuse, recycle!
- dispose of waste properly
- get involved with beach clean ups!

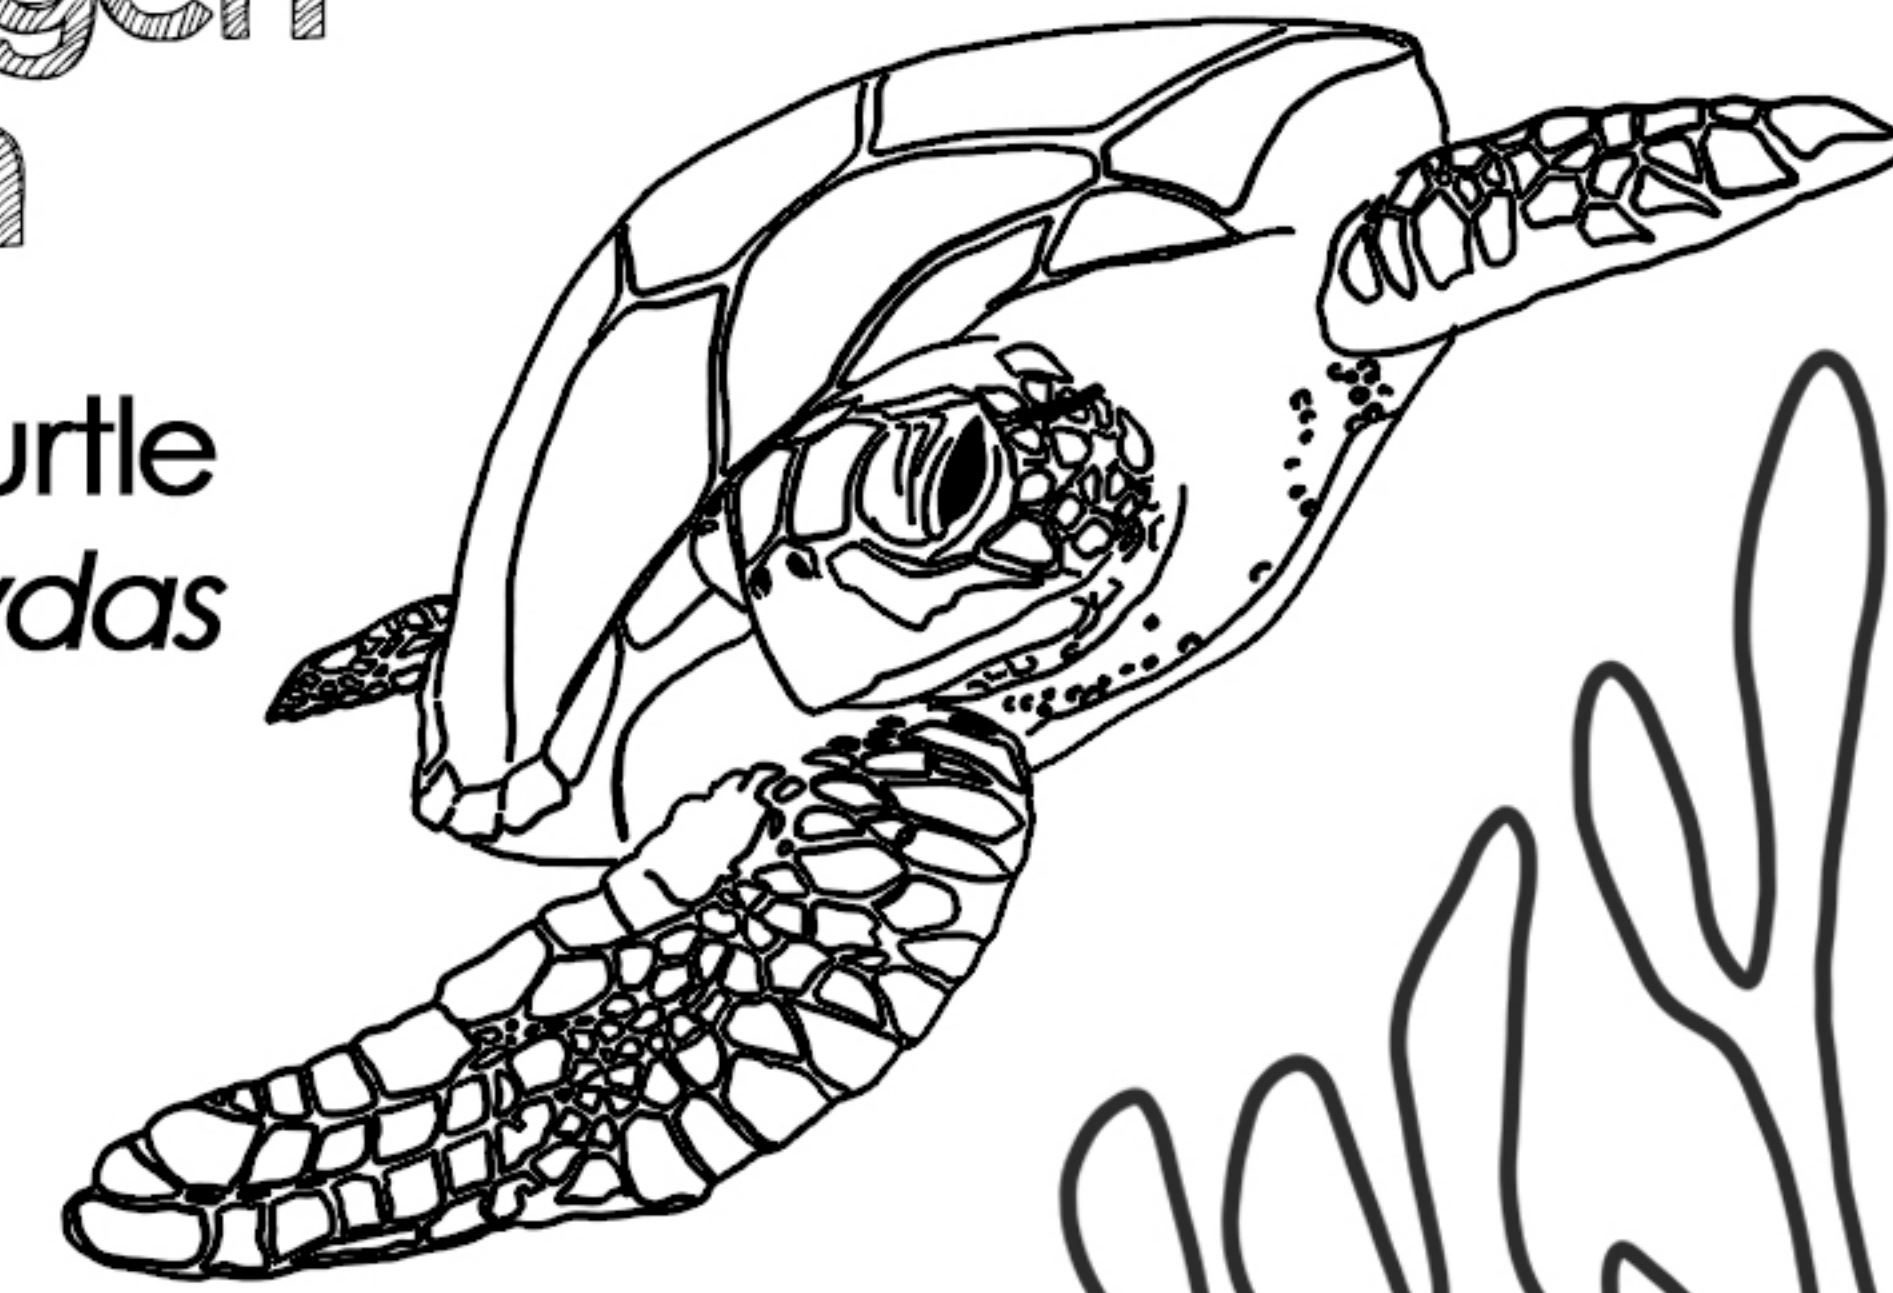

About one million species have been found in the ocean but scientists predict that there are still millions of species that have yet to be discovered!

The ocean produces over half of the world's oxygen & absorbs 50 times more carbon dioxide than our atmosphere!

Atlantic Sea Nettle  
*Chrysaora quinquecirrha*

Green Sea Turtle  
*Chelonia mydas*

There are garbage patches all over the world collecting microplastics and various types of marine debris, swirling through the ocean's water columns.

More than 200 species are impacted by marine debris

Pink Shrimp  
*Pandalus borealis*
